PROFESSIONAL EXPERIENCE

Sr Technical Analyst

Ending Jun 2025

PROGRESSIVE Infotech PVT LTD.

- >> Performed vulnerability scanning and basic penetration testing utilizing Kali Linux toolsets (OpenVAS, Metasploit).
- >> Leveraged tools including Nmap, Wireshark, Metasploit, Hydra, and Burp Suite for advanced security analysis.
- >> Identified and mitigated security threats, malware infections, and unauthorized access attempts.
- >> Diagnosed and resolved complex LAN/WAN, VPN, and network security infrastructure issues.
- >> Monitored system security utilizing centralized antivirus, firewall, and endpoint protection tools.
- >> Applied regular system patches, updates, and ensured compliance with corporate security policies.
- > Handled Microsoft 365 & Outlook configuration, implemented email security, and provided phishing protection.
- > Managed Active Directory operations including user creation, password reset, group policies, and access control.
- > Logged and tracked incidents using the ManageEngine ticketing system, ensuring timely resolutions.
- > Provided remote support using Kasaya Portal & Quick Assist, working with L2/L3 teams for critical incident escalation.
- > Executed data backup, recovery, and disaster management procedures.
- > Installed, configured, and troubleshooted Windows/Linux operating systems and core enterprise applications.

L1 IT Support Engineer

Ending Mar 2025

3I-INFOTECH LIMITED

- >> Ensured compliance with company IT policies and maintained comprehensive documentation of resolved issues.
- >> Assisted in access rights management and identity enforcement via Active Directory.
- > Provided first-level technical support to users for hardware, software, and basic networking issues.
- > Gained hands-on experience resolving LAN/WAN, VPN issues, and performing basic network troubleshooting.
- > Logged and tracked incidents through the ticketing system to ensure timely and effective resolution.
- > Supported Windows OS, MS Office, email configurations, and resolved antivirus issues.

Desktop Support Engineer

Sep 2023 – 2025

AARNA TECHNOLOGY PVT LTD.

>> Performed routine data backup, recovery, and essential system security tasks.

>> Performed system upgrades, patch management, and antivirus installation and updates.

>> Managed user accounts in Active Directory, executing password resets and enforcing access control.

> Installed, configured, and maintained operating systems (Windows, macOS) and software applications.

> Troubleshoot and resolved software and network issues for enterprise desktops, laptops, and peripherals.

> Assisted with network troubleshooting (DNS, DHCP, TCP/IP) and resolved connectivity issues.

> Documented and tracked issues using a ticketing system for timely operational resolution.
